WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 1 Vol. LXXXX. WEEK ENDED SATURDAY. 2nd January, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 285—151 boys and 134 girls, while the number of births to mothers normally resident in the County Borough was 246.

The number of deaths registered was 163—78 males and 85 females. The number of deaths of persons resident in the County Borough was 135.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system and one to tuberculosis of the kidney.

Twenty three deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia, and one from bronchitis.

There were 2 accidental deaths registered, one of which was due to carbon monoxide poisoning.

There was one suicide.

Among the deaths of infants under one year, 6 were due to congenital malformation, 2 to broncho pneumonia ,2 to prematurity, one to injury at birth, one to meningitis, one to whooping cough, and one to respiratory tract infection.

Fifteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 7 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 59.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd January, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 2 Vol. LXXXX. WEEK ENDED SATURDAY, 9th January, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 359—165 boys and 194 girls, while the number of births to mothers normally resident in the County Borough was 268.

The number of deaths registered was 121—67 males and 54 females. The number of deaths of persons resident in the County Borough was 101.

Tuberculosis caused 5 deaths, 4 of which were due to tuberculosis of the respiratory system and one to tuberculosis of the spine and kidneys.

Fourteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia, and 5 from bronchitis

There were 4 accidental deaths registered, one of which was due burns, two to transport accidents and one to suffocation by bed clothes.

Among the deaths of infants under one year, 2 were due to injury at birth, one to suffocation by bed clothes, one to gastro-enteritis, and one to kernicterus.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 56.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th January, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 3 Vol. LXXXX. WEEK ENDED SATURDAY. 16th January, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 268—139 boys and 129 girls, while the number of births to mothers normally resident in the County Borough was 217.

The number of deaths registered was 171—94 males and 77 females. The number of deaths of persons resident in the County Borough was 137.

Tuberculosis caused 7 deaths, 6 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Twelve deaths were due to malignant neoplasms.

There were 7 deaths from pneumonia, and 10 from bronchitis.

There were 3 accidental deaths registered, all of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to congenital malformations, 3 to pneumonia, one to enteritis, 5 to prematurity, one to status lymphaticus, and one to cerebral haemorrhage.

Seventeen of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 79.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 16th January, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 4 Vol. LXXXX. WEEK ENDED SATURDAY, 23rd January, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 336—167 boys and 169 girls, while the number of births to mothers normally resident in the County Borough was 266.

The number of deaths registered was 148—75 males and 73 females. The number of deaths of persons resident in the County Borough was 117.

Tuberculosis caused 5 deaths, 4 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Eighteen deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, 7 from bronchitis, and one from influenza.

There were 2 accidental deaths registered, one of which was due to a transport accident, and one to drowning.

Among the deaths of infants under one year, 3 were due to birth injuries, one to pneumonia, one to tuberculous meningitis, and one to empyema.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 75.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd January, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 5 Vol. LXXXX. WEEK ENDED SATURDAY, 30th January, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 246—127 boys and 119 girls, while the number of births to mothers normally resident in the County Borough was 180.

The number of deaths registered was 115—60 males and 55 females. The number of deaths of persons resident in the County Borough was 96.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Eleven deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia, 9 from bronchitis, and 2 from influenza.

There were 3 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to atelectasis, one to pneumonia, one to gastro-enteritis, one to cyanosis and one to prematurity.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 30th January, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 287—145 boys and 142 girls, while the number of births to mothers normally resident in the County Borough was 217.

The number of deaths registered was 152—79 males and 73 females. The number of deaths of persons resident in the County Borough was 138.

Tuberculosis caused 2 deaths, one of which was due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Twenty-two deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, 10 from bronchitis and one from influenza.

There were 4 accidental deaths registered, one of which was due to a transport accident, one to carbon-monoxide poisoning and one to burns.

Among the deaths of infants under one year, 2 were due to congenital malformations, one to birth injury, 4 to bronchopneumonia, one to infective enteritis, one to asphyxia neonatorum and 3 to prematurity.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 65.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th February, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 7 Vol. LXXXX. WEEK ENDED SATURDAY. 13th February, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 348—171 boys and 177 girls, while the number of births to mothers normally resident in the County Borough was 287.

The number of deaths registered was 174—93 males and 81 females. The number of deaths of persons resident in the County Borough was 145.

Tuberculosis caused 3 deaths, all of which were due to tuberculosis of the respiratory system.

Twenty deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, 9 from bronchitis and 2 from influenza.

There was one suicide.

There were 2 accidental deaths registered.

Among the deaths of infants under one year, 3 were due to congenital malformations, 3 to birth injury, 4 to bronchopneumonia, one to asphyxia neonatorum, 3 to prematurity, one to empyema and one to maldevelopment.

Eighteen of the deaths recorded during the week for the County Borough were those of children under one year of age 11 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 73.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 13th February, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

ROYAL SANITARY INSTITUTE LIBRARY

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 8 Vol. LXXXX. WEEK ENDED SATURDAY, 20th February, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 328—166 boys and 162 girls, while the number of births to mothers normally resident in the County Borough was 249.

The number of deaths registered was 140—60 males and 80 females. The number of deaths of persons resident in the County Borough was 123.

Tuberculosis caused 7 deaths, 6 of which were due to tuberculosis of the respiratory system, and one to tuberculosis of the knee.

Thirteen deaths were due to malignant neoplasms.

There were 9 deaths from pneumonia, 6 from bronchitis and 1 from influenza.

There were 5 accidental deaths registered, two of which were due to transport accidents, two to burns and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 6 were due to congenital malformations, one to birth injury, 2 to bronchopneumonia, 2 to prematurity, one to gastro-enteritis and one to atelectasis.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 70.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 20th February, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 9 Vol. LXXXX. WEEK ENDED SATURDAY. 27th February, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 265—120 boys and 145 girls, while the number of births to mothers resident in the County Borough was 189.

The number of deaths registered was 132—72 males and 60 females. The number of deaths of persons resident in the County Borough was 102.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system, and one to tuberculous meningitis.

Ten deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia, 7 from bronchitis and 1 from influenza.

There were 4 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformations, 4 to pneumonia and one to asphyxia neonatorum.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended **Saturday, 27th February, 1954**, for the Principal Towns with similar particulars for BELFAST and DERRY.

CÚNNTAS SEACHTAINIÚIL na mBREITH agus na mBÁS

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 10 Vol. LXXXX. WEEK ENDED SATURDAY, 6th March, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 339—152 boys and 187 girls, while the number of births to mothers resident in the County Borough was 274.

The number of deaths registered was 138—61 males and 77 females. The number of deaths of persons resident in the County Borough was 122.

Tuberculosis caused 5 deaths, 4 of which were due to tuberculosis of the respiratory system, and one to tuberculous meningitis.

There was one death from diphtheria.

Eleven deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia, and 7 from bronchitis.

There were 2 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 3 were due to congenital malformations, 2 to birth injury, one to haemolytic disease, one to convulsions and one to upper respiratory tract infection.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 73.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th March, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 11 Vol. LXXXX. WEEK ENDED SATURDAY, 13th March, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 354—181 boys and 173 girls, while the number of births to mothers resident in the County Borough was 277.

The number of deaths registered was 172—90 males and 82 females. The number of deaths of persons resident in the County Borough was 142.

Tuberculosis caused 6 deaths, all of which were due to tuberculosis of the respiratory system.

There was one death from diphtheria.

Nineteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia, and 9 from bronchitis.

There were 5 accidental deaths registered, 3 of which were due to transport accidents.

Among the deaths of infants under one year, one was due to congenital malformation, 2 to birth injury, one to atelectasis, one to gastro-enteritis and one to prematurity.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 84.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 13th March, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 12 Vol. LXXXX. WEEK ENDED SATURDAY, 20th March, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 294—161 boys and 133 girls, while the number of births to mothers resident in the County Borough was 225.

The number of deaths registered was 126—72 males and 54 females. The number of deaths of persons resident in the County Borough was 100.

Tuberculosis caused 5 deaths, 4 of which were due to tuberculosis of the respiratory system, and one to tuberculous meningitis.

Ten deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia, and 8 from bronchitis.

There were 3 accidental deaths registered, all of which were due to transport accidents.

Among the deaths of infants under one year, 3 were due to congenital malformations, one to birth injury, 2 to asphyxia neonatorum, one to enteritis, one to meningococcal meningitis, 2 to broncho-pneumonia, and 5 to prematurity.

Fifteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 11 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 47.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 20th March, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 13 Vol. LXXXX. WEEK ENDED SATURDAY, 27th March, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 308—145 boys and 163 girls, while the number of births to mothers resident in the County Borough was 226.

The number of deaths registered was 129—73 males and 56 females. The number of deaths of persons resident in the County Borough was 115.

Tuberculosis caused 10 deaths, 8 of which were due to tuberculosis of the respiratory system and 2 to tuberculous meningitis.

Fifteen deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia, and 9 from bronchitis.

There was one accidental death registered, which was due to burns.

Among the deaths of infants under one year, one was due to birth injury, one to asphyxia neonatorum, one to enteritis, one to tuberculous meningitis, one to pneumonia, one to measles, one to atelectasis and one to prematurity.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 57.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 27th March, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 14 Vol. LXXXX. WEEK ENDED SATURDAY, 3rd April, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 311—154 boys and 157 girls, while the number of births to mothers resident in the County Borough was 249.

The number of deaths registered was 152– 78 males and 74 females. The number of deaths of persons resident in the County Borough was 130.

Tuberculosis caused 3 deaths, all of which were due to tuberculosis of the respiratory system.

Eighteen deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 5 from bronchitis.

There were 2 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to broncho-pneumonia, 2 to atelectasis, 2 to prematurity, 2 to birth injuries, 3 to haemolytic disease, one to measles, one to status lymphaticus, one to asphyxia neonatorum and one to respiratory tract infection.

Fifteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 12 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 68.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd April, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 15 Vol. LXXXX. WEEK ENDED SATURDAY, 10th April, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 299—181 boys and 118 girls, while the number of births to mothers resident in the County Borough was 288.

The number of deaths registered was 133—77 males and 56 females. The number of deaths of persons resident in the County Borough was 113.

Tuberculosis caused 5 deaths, 4 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Sixteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 7 from bronchitis.

There were 6 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, one was due to broncho-pneumonia, one to haemorrhagic disease, one to haemolytic disease, one to asphyxia neonatorum and one to convulsions.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 62.

TABLE I.—BIRTHS and DEATHS registered during the week ended **Saturday, 10th April, 1954, for the Principal Towns with** similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 16 Vol. LXXXX. WEEK ENDED SATURDAY, 17th April, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 268—129 boys and 139 girls, while the number of births to mothers resident in the County Borough was 211.

The number of deaths registered was 123—68 males and 55 females. The number of deaths of persons resident in the County Borough was 105.

Tuberculosis caused 5 deaths, 3 of which were due to tuberculosis of the respiratory system and 2 to tuberculous meningitis.

Thirteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 7 from bronchitis.

There was one accidental death registered, which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to gastro-enteritis, one to congenital malformation, one to asphyxia neonatorum and one to birth injury.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 70.

TABLE I.—BIRTHS and DEATHS registered during the week ended **Saturday, 17th April, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.**

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 17 Vol. LXXXX. Week Ended Saturday, 24th April, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 342—180 boys and 162 girls, while the number of births to mothers resident in the County Borough was 280.

The number of deaths registered was 134—77 males and 57 females. The number of deaths of persons resident in the County Borough was 109.

Tuberculosis caused 7 deaths, 6 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

There was one death from measles.

Twelve deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 6 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 8 were due to prematurity, 4 to pneumonia, 3 to atelectasis, one to tuberculous meningitis, one to gastro-enteritis and one to cardiac failure.

Nineteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 14 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th April, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 18 Vol. LXXXX. WEEK ENDED SATURDAY, 1st May, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 349—175 boys and 174 girls, while the number of births to mothers resident in the County Borough was 271.

The number of deaths registered was 128—74 males and 54 females. The number of deaths of persons resident in the County Borough was 118.

Tuberculosis caused 4 deaths, 3 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

There was one death from measles.

Eighteen deaths were due to malignant neoplasms.

There were 7 deaths from pneumonia and 4 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, one was due to measles, one to acute meningitis, one to congenital malformation, one to prematurity and one to atelectesis.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 68.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 1st May, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 19 Vol. LXXXX. Week Ended Saturday, 8th May, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 329—171 boys and 158 girls, while the number of births to mothers resident in the County Borough was 277.

The number of deaths registered was 113—65 males and 48 females. The number of deaths of persons resident in the County Borough was 100.

Tuberculosis caused 6 deaths, all of which were due to tuberculosis of the respiratory system.

There was one death from measles.

Twenty deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia and 3 from bronchitis.

There were 2 accidental deaths registered, one of which was due to poisoning and one to drowning.

Among the deaths of infants under one year, one was due to measles, 2 to broncho-pneumonia, 4 to congenital malformations, one to asphyxia neonatorum and one to congestive heart disease.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended **Saturday**, 8th May, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 20 Vol. LXXXX. WEEK ENDED SATURDAY, 15th May, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 397—196 boys and 201 girls, while the number of births to mothers resident in the County Borough was 325.

The number of deaths registered was 139—73 males and 66 females. The number of deaths of persons resident in the County Borough was 111.

Tuberculosis caused 6 deaths, 4 of which were due to tuberculosis of the respiratory system, one to tuberculous meningitis and one to tuberculous peritonitis.

Fourteen deaths were due to malignant neoplasms.

There were 7 deaths from pneumonia and 6 from bronchitis.

There were 3 accidental deaths registered, 2 of which were due to transport accidents.

Among the deaths of infants under one year, 3 were due to broncho-pneumonia, 3 to atelectasis, 2 to congenital malformation, one to tuberculous meningitis, one to upper respiratory tract infection, one to acute bronchitis, one to birth injury and one to prematurity.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 15th May, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 21 Vol. LXXXX. WEEK ENDED SATURDAY, 22nd May, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 410—209 boys and 201 girls, while the number of births to mothers resident in the County Borough was 345.

The number of deaths registered was 121—69 males and 52 females. The number of deaths of persons resident in the County Borough was 103.

Tuberculosis caused 4 deaths, all of which were due to tuberculosis of the respiratory system.

Seventeen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 7 from bronchitis.

There were 5 accidental deaths registered ,3 of which were due to transport accidents.

Among the deaths of infants under one year, 3 were due to broncho-pneumonia, 2 to atelectasis, one to cerebro spinal meningitis, one to influenzal pneumonia, one to haemolytic disease of newborn and one to prematurity.

Nine of the deaths recorded during the week for the County Borough were those of children under one year of age, 5 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 47.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 22nd May, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 22 Vol. LXXXX. Week Ended Saturday, 29th May, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford. with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 398—214 boys and 184 girls, while the number of births to mothers resident in the County Borough was 323.

The number of deaths registered was 126—61 males and 65 females. The number of deaths of persons resident in the County Borough was 113.

Tuberculosis caused 6 deaths, all of which were due to tuberculosis of the respiratory system.

Sixteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 5 from bronchitis.

There were 2 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, one was due to measles, one to gastro-enteritis and one to birth injury.

Three of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 66.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 29th May, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 23 Vol. LXXXX. WEEK ENDED SATURDAY, 5th June, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 350—180 boys and 170 girls, while the number of births to mothers resident in the County Borough was 277.

The number of deaths registered was 105—52 males and 53 females. The number of deaths of persons resident in the County Borough was 87.

Tuberculosis caused 7 deaths, all of which were due to tuberculosis of the respiratory system.

Eighteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 3 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident and one to carbon-monoxide poisoning.

Among the Deaths of infants under one year, 2 were due to congenital malformations, 2 to pneumonia and one to prematurity.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 4 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 48.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 5th June, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 24 Vol. LXXXX. Week Ended Saturday, 12th June, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 384—197 boys and 187 girls, while the number of births to mothers resident in the County Borough was 310.

The number of deaths registered was 120—64 males and 56 females. The number of deaths of persons resident in the County Borough was 94.

Tuberculosis caused 7 deaths, 6 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Eighteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 3 from bronchitis.

There were 4 accidental deaths registered, one of which was due to a transport accident, one to burns and one to drowning.

Deaths of persons aged 65 years and upwards numbered 58. There were no deaths of children under one year of age recorded during the week for the County Borough.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 12th June, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 25 Vol. LXXXX. WEEK ENDED SATURDAY, 19th June, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 328—162 boys and 166 girls, while the number of births to mothers resident in the County Borough was 265.

The number of deaths registered was 114—61 males and 53 females. The number of deaths of persons resident in the County Borough was 89.

There was one death from measles.

Tuberculosis caused 4 deaths, 3 of which were due to tuberculosis of the respiratory system and one to spinal caries.

Eleven deaths were due to malignant neoplasms.

There were 2 deaths from bronchitis and one from pneumonia.

There were 4 accidental deaths registered.

Among the deaths of infants under one year, 3 were due to congenital malformations, 3 to prematurity, one to neo-natal infection, one to haemorrhagic disease, one to asphyxia neonatorum and one to suffocation by bed clothes.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 10 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 44.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 19th June, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 26 Vol. LXXXX. WEEK ENDED SATURDAY, 26th June, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 359—172 boys and 187 girls, while the number of births to mothers resident in the County Borough was 273.

The number of deaths registered was 95—53 males and 42 females. The number of deaths of persons resident in the County Borough was 74.

There was one death from tuberculosis of the respiratory system.

Nine deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and one from bronchitis.

There were 2 accidental deaths registered, both of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to prematurity, 2 to congenital malformations, 2 to pneumonia, one to gastro-enteritis, one to haemolytic disease, one to birth injury, one to atelectasis and one to asphyxia neonatorum.

Thirteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 11 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 35.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 26th June, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 27 Vol. LXXXX. WEEK ENDED SATURDAY, 3rd July, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 375—189 boys and 186 girls, while the number of births to mothers resident in the County Borough was 306.

The number of deaths registered was 104—51 males and 53 females. The number of deaths of persons resident in the County Borough was 86.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Eighteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 3 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident and one to drowning.

Among the deaths of infants under one year, 2 were due to congenital malformations, one to pneumonia, one to atelectasis and one to cellulitis of hand.

Five of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 44.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd July, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 28 Vol. LXXXX. WEEK ENDED SATURDAY, 10th July, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 392—199 boys and 193 girls, while the number of births to mothers resident in the County Borough was 308.

The number of deaths registered was 102—54 males and 48 females. The number of deaths of persons resident in the County Borough was 85.

Tuberculosis caused 4 deaths, 2 of which were due to tuberculosis of the respiratory system, one to tuberculoma and one to Pott's caries.

Ten deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 7 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident

Among the deaths of infants under one year, 4 were due to prematurity, 2 to pneumonia, 2 to gastro-enteritis, 3 to congenital malformations and one to atelectasis.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 47.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 10th July, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 29 Vol. LXXXX. WEEK ENDED SATURDAY, 17th July, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 343—170 boys and 173 girls, while the number of births to mothers resident in the County Borough was 264.

The number of deaths registered was 115—60 males and 55 females. The number of deaths of persons resident in the County Borough was 90.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Twenty three deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 2 from bronchitis.

There was one accidental death registered, which was due to a transport accident

There was one suicide.

Among the deaths of infants under one year, 5 were due to congenital malformations, 4 to prematurity, 2 to pneumonia, and one to asphyxia.

Twelve of the deaths recorded during the week for the County Borough were those of children under one year of age, 9 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 17th July, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 30 Vol. LXXXX. WEEK ENDED SATURDAY, 24th July, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 320—164 boys and 156 girls, while the number of births to mothers resident in the County Borough was 256.

The number of deaths registered was 96—52 males and 44 females. The number of deaths of persons resident in the County Borough was 81.

Tuberculosis caused one death which was due to tuberculous meningitis.

Fourteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 1 from bronchitis.

There were 4 accidental deaths registered, 2 of which were due to transport accidents, and 2 to drowning.

Among the deaths of infants under one year, one was due to atelactasis, one to pneumonia, and one to streptococcal infection.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 24th July, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 31 Vol. LXXXX. WEEK ENDED SATURDAY, 31st July, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 322—164 boys and 158 girls, while the number of births to mothers resident in the County Borough was 242.

The number of deaths registered was 114—68 males and 46 females. The number of deaths of persons resident in the County Borough was 84.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Eighteen deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and 2 from bronchitis.

There was one accidental death registered, which was due to asphyxia.

Among the deaths of infants under one year, 5 were due to congenital malformation, 4 to prematurity, 2 to injury at birth, one to whooping cough, one to haemolytic disease of newborn and one to acute endocarditis.

Fourteen of the deaths recorded during the week for the County Borough were those of children under one year of age, 11 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 38.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 31st July, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 32 Vol. LXXXX. WEEK ENDED SATURDAY, 7th August, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 357—194 boys and 163 girls, while the number of births to mothers resident in the County Borough was 274.

The number of deaths registered was 79—52 males and 27 females. The number of deaths of persons resident in the County Borough was 69.

Tuberculosis caused 4 deaths, all of which were due to tuberculosis of the respiratory system.

Eleven deaths were due to malignant neoplasms.

There were 2 deaths from bronchitis.

There was one accidental death registered, which was due to a transport accident.

There was one suicide.

One infant under one month old died from neo-natal septicaemia.

Thirty-eight of the deaths recorded during the week for the County Borough were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 7th August, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 33 Vol. LXXXX. WEEK ENDED SATURDAY, 14th August, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 294—147 boys and 147 girls, while the number of births to mothers resident in the County Borough was 224.

The number of deaths registered was 105—50 males and 55 females. The number of deaths of persons resident in the County Borough was 81.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Eleven deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and one from bronchitis.

There were 6 accidental deaths registered, 2 of which were due to transport accidents, and 2 to drowning.

Among the deaths of infants under one year, 3 were due to prematurity, one to injury at birth, one to atelectasis and one to broncho-pneumonia.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, all of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 14th August, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 34 Vol. LXXXX. WEEK ENDED SATURDAY, 21st August, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 251—120 boys and 131 girls, while the number of births to mothers resident in the County Borough was 203.

The number of deaths registered was 99—45 males and 54 females. The number of deaths of persons resident in the County Borough was 76.

Tuberculosis caused 4 deaths, 3 of which were due to tuberculosis of the respiratory system, and one to tuberculous meningitis.

Fourteen deaths were due to malignant neoplasms.

There were 5 deaths from bronchitis and one from pneumonia.

There were two accidental deaths registered, one of which was due to a transport accident.

One infant died from prematurity.

Forty-four of the deaths recorded during the week for the County Borough were those of persons aged 65 years and upwards.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 21st August, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS	Population 1951	BIRTHS	DEATHS	DEATHS

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 35 Vol. LXXXX. WEEK ENDED SATURDAY, 28th August, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comp a-tive figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 303—141 boys and 162 girls, while the number of births to mothers resident in the County Borough was 237.

The number of deaths registered was 107—59 males and 48 females. The number of deaths of persons resident in the County Borough was 85.

Tuberculosis caused 4 deaths, all of which were due to tuberculosis of the respiratory system.

Thirteen deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 2 from bronchitis.

There was one accidental death registered, which was due to a transport accident.

Among the deaths of infants under one year, 4 were due to prematuirty, 2 to atelectasis, one to injury at birth, one to pneumonia and one to convulsions.

Ten of the deaths recorded during the week for the County Borough were those of children under one year of age, all of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 50.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 28th August, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 36 Vol. LXXXX. WEEK ENDED SATURDAY, 4th September 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 334—175 boys and 159 girls, while the number of births to mothers resident in the County Borough was 248.

The number of deaths registered was 109—59 males and 50 females. The number of deaths of persons resident in the County Borough was 93.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Twelve deaths were due to malignant neoplasms.

There were 4 deaths from pneumonia and 5 from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident, and one to drowning.

Among the deaths of infants under one year, 3 were due to broncho-pneumonia, one to congenital malformation, one to gastro-enteritis and one to prematurity.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 4th September, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 37 Vol. LXXXX. Week Ended Saturday, 11th September 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 369—211 boys and 158 girls, while the number of births to mothers resident in the County Borough was 306.

The number of deaths registered was 108—54 males and 54 females. The number of deaths of persons resident in the County Borough was 83.

Tuberculosis caused 2 deaths, both of which were due to tuberculosis of the respiratory system.

Twenty-two deaths were due to malignant neoplasms.

There were 2 deaths from pneumonia and one from bronchitis.

There were 3 accidental deaths registered, one of which was due to a transport accident, and one to burns.

One infant aged 10 weeks, died from gastro-enteritis.

Deaths of persons aged 65 years and upwards numbered 50.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 11th September, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 37 Vol. LXXXX. Week Ended Saturday, 18th September 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I Deaths have been assigned so far as possible, to the area of residence and those of non residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 278—145 boys and 133 girls, while the number of births to mothers resident in the County Borough was 203.

The number of deaths registered was 94—47 males and 47 females. The number of deaths of persons resident in the County Borough was 79.

Tuberculosis caused 2 deaths, one of which was due to tuberculosis of the respiratory system and one to tuberculosis of the kidney.

Twelve deaths were due to malignant neoplasms.

There was one death from influenza, one from pneumonia and 4 from bronchitis.

There were 3 accidental deaths registered, one of which was due to scalds.

Among the deaths of infants under one year, 4 were due to prematurity, one to haemorrhagic disease, one to broncho-pneumonia, one to asphyxia neonatorum and one to perforation of the stomach.

Eight of the deaths recorded during the week for the County Borough were those of children under one year of age, 6 of whom were under one month old. Deaths of persons aed 65 years and upwards numbered 41.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 18th September, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 39 Vol. LXXXX. Week Ended Saturday, 25th September 1954 Price 2d. Nei

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough, and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 350—170 boys and 180 girls, while the number of births to mothers resident in the County Borough was 284.

The number of deaths registered was 125—64 males and 61 females. The number of deaths of persons resident in the County Borough was 97.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system and one to tuberculous meningitis.

Eighteen deaths were due to malignant neoplasms.

There were 3 deaths from pneumonia and 2 from bronchitis.

There was one accidental death registered.

Among the deaths of infants under one year, one was due to gastro enteritis, one to broncho-pneumonia, 2 to congenital malformations, one to congenital debility, one to birth injury and one to prematurity.

Seven of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 25th September, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 40 Vol. LXXXX. WEEK ENDED SATURDAY, 2nd October 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 351—172 boys and 179 girls, while the number of births to mothers resident in the County Borough was 289.

The number of deaths registered was 94—46 males and 48 females. The number of deaths of persons resident in the County Borough was 83.

Tuberculosis caused 6 deaths, all of which were due to tuberculosis of the respiratory system.

Nine deaths were due to malignant neoplasms.

There were 2 deaths from bronchitis.

There were 4 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, one was due to gastro enteritis, 4 to prematurity, 2 to atelectasis, one to congenital malformation, one to pyelonephritis and one to interstitial emphysema.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, 8 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 49.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd October, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 41 Vol. LXXXX. WEEK ENDED SATURDAY, 9th October 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 358—192 boys and 166 girls, while the number of births to mothers resident in the County Borough was 294.

The number of deaths registered was 115—60 males and 55 females. The number of deaths of persons resident in the County Borough was 99.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system, and one to tuberculous meningitis

Fifteen deaths were due to malignant neoplasms.

There were 6 deaths from bronchitis.

There were 3 accidental deaths registered.

Among the deaths of infants under one year, two were due to pneumonia, one to hydrocephalus and one to an enlarged thymus gland.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 years and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 9th October, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 42 Vol. LXXXX. WEEK ENDED SATURDAY, 16th October 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 316—149 boys and 167 girls, while the number of births to mothers resident in the County Borough was 245.

The number of deaths registered was 107—52 males and 55 females. The number of deaths of persons resident in the County Borough was 85.

There were 2 deaths from tuberculosis of the respiratory system,.

Fifteen deaths were due to malignant neoplasms.

There was one death from bronchitis.

There was one accidental death registered.

There were 2 deaths of infants under one year, due to prematurity.

Two of the deaths recorded during the week for the County Borough were those of children under one year of age, both of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 55.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 16th October, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 43 Vol. LXXXX. WEEK ENDED SATURDAY, 23rd October 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II. information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 374—191 boys and 183 girls, while the number of births to mothers resident in the County Borough was 307.

The number of deaths registered was 118—65 males and 53 females. The number of deaths of persons resident in the County Borough was 102.

There were 2 deaths from tuberculosis of the respiratory system.

Nineteen deaths were due to malignant neoplasms.

There was 3 deaths from bronchitis.

There were four accidental deaths registered, one of which was due to a transport accident.

Among the deaths of children under one year, 4 were due to congenital malformation, 3 to prematurity, 2 to pneumonia, one to birth injury and one to atelectasis.

Eleven of the deaths recorded during the week for the County Borough were those of children under one year of age, nine of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 54.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd October, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 45 Vol. LXXXX. WEEK ENDED SATURDAY, 6th November, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 304—164 boys and 140 girls, while the number of births to mothers resident in the County Borough was 244.

The number of deaths registered was 113—66 males and 47 females. The number of deaths of persons resident in the County Borough was 88.

There were 4 deaths from tuberculosis of the respiratory system.

Fifteen deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia, 4 from bronchitis, and one from influenza.

There were 4 accidental deaths registered, one of which was due to a transport accident, one to burns, and one to drowning.

Among the deaths of children under one year, one was due to infective enteritis and one to pneumonia.

Two of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 years and upwards numbered 45.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 6th November, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 46 Vol. LXXXX. WEEK ENDED SATURDAY, 13th November, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I Deaths have been assigned so far as possible, to the area of residence and those of non residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 291 —156 boys and 135 girls, while the number of births to mothers resident in the County Borough was 236.

The number of deaths registered was 126—68 males and 58 females. The number of deaths of persons resident in the County Borough was 108.

There were 3 deaths from tuberculosis of the respiratory system.

Twenty-five deaths were due to malignant neoplasms.

There were 7 deaths from bronchitis, and one from pneumonia.

There were 4 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of children under one year, one was due to prematurity and one to pneumonia.

Two of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 62.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 13th November, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 47 Vol. LXXXX. WEEK ENDED SATURDAY, 20th November, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 304—161 boys and 143 girls, while the number of births to mothers resident in the County Borough was 244.

The number of deaths registered was 138—74 males and 64 females. The number of deaths of persons resident in the County Borough was 117.

There were 3 deaths from tuberculosis of the respiratory system.

Twenty-four deaths were due to malignant neoplasms.

There were 6 deaths from pneumonia, and four from bronchitis.

There were 5 accidental deaths registered, 2 of which were due to transport accidents, and one to drowning.

Among the deaths of children under one year, 5 were due to pneumonia, 4 to congenital malformation, 3 to injury at birth, 3 to prematurity, 2 to atelectasis and one to ulcerative colitis.

Eighteen of the deaths recorded during the week for the County Borough were those of children under one year of age, fifteen of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 60.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 20th November, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS	POPULATION 1951	BIRTHS	DEATHS	DEATHS CAUSED BY

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 48 Vol. LXXXX. Week Ended Saturday, 27th November, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 280—151 boys and 129 girls, while the number of births to mothers resident in the County Borough was 214.

The number of deaths registered was 115—54 males and 61 females. The number of deaths of persons resident in the County Borough was 102.

Tuberculosis caused 6 deaths, 5 of which were due to tuberculosis of the respiratory system, and one to tuberculosis meningitis.

Seventeen deaths were due to malignant neoplasms.

There was one death from pneumonia, and 7 from bronchitis.

There were no accidental deaths registered.

Among the deaths of children under one year, 1 was due to broncho-pneumonia, 2 to congenital malformation, 1 to prematurity, and 2 to atelectasis.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 67.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 27th November, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 49 Vol. LXXXX. Week Ended Saturday, 4th December, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 277—147 boys and 130 girls, while the number of births to mothers resident in the County Borough was 219.

The number of deaths registered was 141—82 males and 59 females. The number of deaths of persons resident in the County Borough was 120.

There were 5 deaths from tuberculosis of the respiratory system.

Twenty deaths were due to malignant neoplasms.

There were 7 deaths from pneumonia, 2 from bronchitis, and one from influenzal broncho-pneumonia.

There were 2 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to pneumonia, 7 to congenital malformation, 2 to injury at birth, 2 to prematurity, 4 to atelectasis, one to influenzal broncho-pneumonia, one to acute purulent meningitis, and one to gastro-enteritis.

Twenty of the deaths recorded during the week for the County Borough were those of children under one year of age, 18 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 55.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 4th December, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 50 Vol. LXXXX. Week Ended Saturday, 11th December, 1954 Price 2d. Net

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 254—131 boys and 123 girls, while the number of births to mothers resident in the County Borough was 202.

The number of deaths registered was 128—60 males and 68 females. The number of deaths of persons resident in the County Borough was 114.

There was one death from tuberculosis of the respiratory system.

Twenty deaths were due to malignant neoplasms.

There were 8 deaths from pneumonia, and 4 from bronchitis.

There were 2 accidental deaths registered, one of which was due to carbon monoxide poisoning.

Among the deaths of infants under one year, one was due to congenital malformation, one to injury at birth, and one to bronchitis.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age, 3 of whom were under one month old. Deaths of persons aged 65 years and upwards numbered 74.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 11th December, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 297—143 boys and 154 girls, while the number of births to mothers resident in the County Borough was 223.

The number of deaths registered was 142—72 males and 70 females. The number of deaths of persons resident in the County Borough was 116.

There was 6 deaths from tuberculosis of the respiratory system.

Fifteen deaths were due to malignant neoplasms.

There were 12 deaths from pneumonia, and 7 from bronchitis.

There were 5 accidental deaths registered, one of which was due to a transport accident.

Among the deaths of infants under one year, 2 were due to congenital malformations, one to atelectasis, and 3 to pneumonia.

Six of the deaths recorded during the week for the County Borough were those of children under one year of age, one of whom was under one month old. Deaths of persons aged 65 years and upwards numbered 77.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 18th December, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office from data supplied by the Ard Chlaraitheoir

To be purchased through any Bookseller or directly from
THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 52 Vol. LXXXX. WEEK ENDED SATURDAY, 25th December, 1954 PRICE 2d. NET

PRINCIPAL TOWNS

Particulars of the births and deaths recorded for the *Principal Towns* are given in Table I. Deaths have been assigned so far as possible, to the area of residence and those of non-residents have been excluded. In Table II, information is shown regarding the deaths recorded for each registrar's district in Dublin County Borough and Cork County Borough. Table III shows the number of cases of infectious diseases notified in Dublin County Borough, Dun Laoghaire Borough and the County Boroughs of Cork, Limerick and Waterford, with comparative figures for each of the three preceeding weeks.

DUBLIN COUNTY BOROUGH

The number of births registered during the week was 183—100 boys and 83 girls, while the number of births to mothers resident in the County Borough was 147.

The number of deaths registered was 105—52 males and 53 females. The number of deaths of persons resident in the County Borough was 83.

There were 2 deaths from tuberculosis of the respiratory system.

Sixteen deaths were due to malignant neoplasms.

There were 9 deaths from pneumonia, and 3 from bronchitis.

There were 3 accidental deaths registered, one of which was due to burns and one to accidental suffocation.

Among the deaths of infants under one year, 2 were due to broncho-pneumonia, one to meningococcal septicaemia and one to accidental suffocation.

Four of the deaths recorded during the week for the County Borough were those of children under one year of age. Deaths of persons aged 65 years and upwards numbered 53.

TABLE I.—BIRTHS and DEATHS registered during the week ended Saturday, 25th December, 1954, for the Principal Towns with similar particulars for BELFAST and DERRY.
